Delivered Value Rank, by County

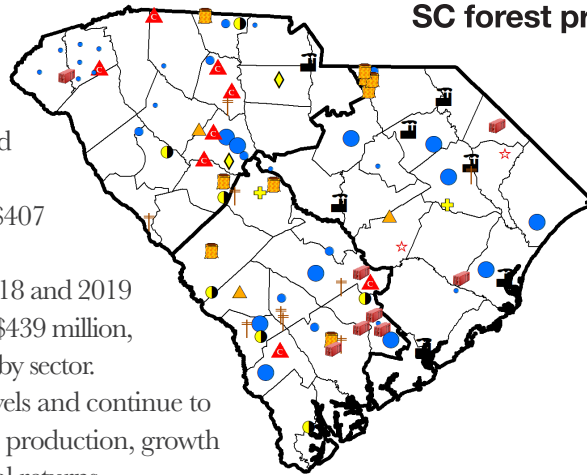

Timber values are based on results of the 2019 Timber Products Output (TPO) Survey. "Acres of Forestland" and "Percent Forest" fields are based on 2019 estimates from the Forest Inventory and Analysis (FIA) program. Both programs are jointly administered by the USDA Forest Service - Southern Research Station and the South Carolina Forestry Commission. TPO numbers are designed to be interpreted at the state level. FIA numbers are designed to be interpreted at the state survey unit level.

# FAST FACTS

## ABOUT SOUTH CAROLINA FOREST PRODUCTS

### Did you know...?

- Pulpwood is the state's leading forest product by volume, and production increased slightly (~1%) to 358 million cubic feet between 2018 and 2019. Pulpwood is South Carolina's second-most valuable forest product by sector, accounting for \$407 million (~39%) of delivered timber value.
- Sawtimber production increased 4.5% between 2018 and 2019 to 290 million cubic feet, with a delivered value of \$439 million, overtaking pulpwood as the most valuable product by sector.
- Timber volumes and growth remain at record levels and continue to increase, offering opportunities for expanded mill production, growth in job numbers and improved landowner financial returns.
- South Carolina exported \$1.25 billion in forest products in 2019, a decrease of 11.3% over the previous year. Exports from the top three industries – paper & paperboard, woodpulp and solid wood products – represented 49%, 35% and 9% of the total reported for 2019, respectively.
- Based on 2018 data, forestry contributes more than \$21 billion annually to South Carolina's economy and represents one of the state's leading manufacturing sectors in terms of jobs (98,306) and labor income (\$4.96 billion).
